Income using technology

Technology is a tool or machine that makes our life easier, especially those persons or people that works in the market. Technology helps people when it comes to measuring weigh using digital weighing scale, cutting hair using digital tool instead of using regular scissors and using computer to access prices more efficiently. It does not only make our life easy, it also makes the income of a market earn more. Using or depending too much in using digital tools can affect us in a way that we will forget how to use or manipulate things without using digital tools. Digital tools may help us in making our lives more easier but we should always remember that things works much better if we balance on using digital and modern tools everytime we work.

The New Way to Sell

2nd

With a tap and a post, small business turn social media into a marketplace reaching customers beyond the limits of their streets and communities. Digital has been expose all over the world, from product photos to online promotions. From computing money manually to automatically get the exact outcome automatically.

As consumers spend more time online business follow them there, transforming clicks, shares, and views into new chances for growth.

A simple post can open a door to a wider market, proving that in today's economy business can begin with nothing more than a screen and an idea. In a nutshell, let us all remember that everything is marketing, People are living in a digital world with a purpose. That's all, thank you. :))

DIGITAL PAYMENT

VS

TRADITIONAL PAYMENT

Let's start with Digital payment if you say digital payment you need an card or cell phone to pay for the products you bought. Digital is not always good to use because you need data or wifi and scanner to pay. But if you say traditional payment all you need is an wallet not an e wallet just an wallet or pockets for keeping bank notes or coins. But for them they prefer traditional Payment because traditional payment is more simple than the digital payment like other vendors don't have any cellphone to use or an scanner, wifi, data. For you what is better digital payment or do you prefer traditional payment?

Advanced Market

Digital helps people to make work ~~easier~~ even faster. Even at the market, digital contributes a huge help at the vendors. Some customer uses their phone to pay what they bought, vendors use a calculator instead of counting by hands, and others just weigh the product just to see the total price. But not all of them use digital, others use what they've learned without using digital, just like counting, calculating, and others, because not all people can afford digital systems nor technology, and they would rather endure the difficulty just to earn enough and provide their family's need. But it's up to you, if you would choose to work with digital and make your work easier, or endure the hardness just to earn enough and give their family a stable life.

Where Old Way and New Way Taps

Bright day pass, people carry something heavy, market is full of stories. Traditional and Digital Meets. It is either old people, young students, and parents who push their bodies to thrive and gain to secure for their family. Digital helps people to improve the old way. But, that doesn't mean traditional doesn't matter anymore. It carry something digital can't replace. Traditional and Digital contribute comfortability. Everywhere we go both ways will always have a special place in our lives.
